

THE INDEPENDENT PRICING AND REGULATORY TRIBUNAL OF NS'

APPLICATION FOR A SPECIAL VARIATION TO GENERAL INCOME

Under Section 508(2) of the Local Government Act 1993 2013/14

SECTION 508(2) APPLICATION FORM SV2 - PART A

Before completing this form, you MUST read the Division of Local Government's

Guidelines for the preparation of an application for a special variation to general income

Guidelines are available on the Division's website at www.dlg.nsw.gov.au.

NOTE: This part of the application must be completed in conjunction with Part B (Special Variation Application Form - Part B 2013/14)

Instructions

Both Part A and Part B of the application are designed to be completed on your computer and then emailed together to IPART at localgovernment@ipart.nsw.gov.au.

This part of the application (Part A) consists of six worksheets:

- Worksheet 1 (Identification): Identifies the council making the application and a council contact officer, collects information on expiring variations and the term of the proposed variation and provides a summary of the variation based on WK4 calculations.
- ► Worksheet 2 (Notional General Income): Calculates the council's Notional General Income for the current financial year (eg, 2012/13).
- Worksheet 3 (General Income Yield): Calculates the council's proposed General Income yield for year 1 in the application (eg, 2013/14).
- Worksheet 4 (Calculation): Calculates the council's Permissible Income based on the input of the special variation percentage and Crown land adjustments, plus other adjustments to income in 2013/14.
- Worksheet 5 (Impact on Rates): Calculates the average increase in rates and charges in each sub-category, with and without the proposed special special variation. Also collects the assessment numbers in ordinary rate categories for different land values and the proposed rate levels across this distribution in 2013/14.
- Worksheet 6 (Expenditure Program): Collects the various service and project allocations in the council's proposed expenditure program that the special variation is sought to fully or partially fund. It includes any loans that the council is proposing as part of its program of expenditure.

Detailed instructions on how each of these worksheets must be completed are provided below.

Worksheet 1 - Identification

- Select your council name from the drop down list.
- Enter contact details for the responsible officer.
- Enter details of any existing special variation due to expire on 30 June 2013 or the council's preference for another variation to expire earlier than the approved expiry date.
- Enter any details as requested regarding expiring existing special variations in the Expiring Special Variation section. Note that any expiring amount needs to be verified by
- The other calculations in this worksheet (including the special variation percentage) will k generated once worksheets 2-4 are correctly completed by the council.

Worksheet 2 - Notional General Income

This worksheet calculates the Notional General Income for the previous year, by applying the rating structure used in the previous year to land values, adjusted by supplementary valuations received during that year.

Land values should be adjusted to reflect changes resulting from supplementary valuations received during the previous year. Any inclusion in this worksheet as a "supplementary valuation" must abide with the "definition" contained in Section 4 of the *Valuation of Land Act 1916* and does not necessarily include all entries contained in a supplementary list.

What to include:

The following examples are supplementary valuations that **should** be included:

- ▷ Any increase or decrease in supplementary valuations following subdivisions etc, providing they are included in the same year as furnished (in accordance with section 509(2)(b) of the Local Government Act).
- \triangleright An amended value on a valuation objection in relation to a supplementary valuation.
- Landcom parcels where the supplementary valuation is furnished and the date of sale occur in the same year. Additional income for parcels not sold in the same year can be sought via an Income Adjustment application (about April each year).

What not to include:

The following examples are **NOT** be included:

- \triangleright Parcels which change rateability.
- > An amended value on a **valuation objection**, appeal, or correction of a clerical error, in relation to a general valuation (no change to notional general income).
- An amended value on a parcel that has become non-rateable e.g. State Forest (i.e. Council's notional general income is not reduced).
- ▷ A new valuation (Section 19B Valuation of Land Act) for land which was non-rateable and not valued and has become rateable. e.g. a closed road.

The following are supplementary valuations that are **NOT** to be included:

> Supplementary valuations with a **different base date** following a revaluation.

Worksheet 3 - General Income Yield

This worksheet calculates the proposed Notional General Income Yield. It should apply the rating structure, including the proposed special variation increase, to land values adjusted by supplementary valuations received during the previous year.

The rating structure entered here must reflect that proposed in your Draft Operational Plan or Delivery Program.

NOTE: Particular attention should be paid to the proposed rating structure to ensure it complies with legislation. Do not assume that your current rating structure is compliant.

A rating structure that does not comply with the legislation may not be approved.

V cla Pe tha wa	Prior year result: This is the catch-up or excess ount from the previous year, as advised by the ision. Valuation Objections: If you successfully imed valuation objections in the previous year, rmissible General Income must be reduced by t amount (to strip out the additional income that s claimed from the revenue base). Check this ure with DLG.

Worksheet 5 - Impact on Rates

This worksheet is designed to show the average rate increase per sub-category (ordinary and special rates), with and without the proposed special variation.

It also shows the distribution of ordinary rates across different land value ranges and how different (ordinary) ratepayers will be impacted by the proposed special variation in 2013/14, depending on the value of their land.

All shaded areas on this schedule will populate automatically from data entered in either Worksheet 3 (General Income Yield) or in the white cells in this sheet.

Councils **must** enter in both the average rates per sub-category if the special variation is not approved (such that the rate peg increase would apply) AND the average rates if the special variation was approved as requested.

Councils **must** also enter the number of assessments in the ordinary rating categories (residential, business and farmland) across various land value ranges in 2012/13, and the rate levels for different land values in 2012/13, and for 2013/14 with and without the proposed special variation.

Note:

1. Average rates equal the total income generated by a category or sub-category of rates divided by the number of assessments in that same category.

2. Rate levels should include any expiring variations and so reflect what rate levels would be.3. An error message of **#VALUE!** or **#DIV/0!** in any of the cells may indicate:

- Main category name not selected on 'General Income Yield' schedule
- An incomplete rating structure entered on 'General Income Yield' schedule
- No average rate data in column D.

Worksheet 6 - Proposed Program of Expenditure

This worksheet is designed to show how the council proposes to spend the additional funding generated from the special variation. This information reflects the "program of works" information requested in previous years in Part B of the special variation applications.

* This worksheet is not protected to allow the council flexibility to add or delete rows.

The worksheet automatically calculates the rate peg income and additional income from the proposed special variation in 2013/14 (Year 1).

Councils **must** complete the total rate peg income and additional special variation income rows from year 2 of the variation, as necessary for the period of the variation. For example, for 1 year fixed term variations, the council may leave years 2 to 10 columns blank.

For 5 year fixed term variations, the council should enter in the additional income up to Year 5. For ongoing variations, the council should enter in the additional income over 10 years.

Councils **must** enter in each of the individual program/project names in their overall spending program (or program of works) in column C under one of these headings:

- Maintenance of current services
- Enhanced services
- New projects/services
- Borrowing costs.

For example, individual programs/projects may include: roads program,

environmental projects, library upgrades, city centre upgrades, new sports & leisure centre. The placement of each program/project in the worksheet will reflect whether the proposed spending will result in maintenance of current services, an enhancement of current service levels or a new project entirely.

Some councils may have numerous programs or projects to include; others may have a single program or project only.

In this worksheet, councils must also:

- Enter in the value of external loans proposed as part of the program of expenditure.
- Enter in the proposed spending allocations for each program/project in each year of the variation. Eg, 5 year fixed term variations over 5 years; ongoing variations over 10 years.
- Enter in borrowing costs when the council is proposing to borrow funds as part of its proposed program of expenditure.
- Sum the total spending allocations for each year of the variation.

The spreadsheet will calculate the difference between the total expenditure program and the additional income generated by the special variation. This may not equal zero because: the proposed program of expenditure may include other funding sources (eg, loans), or the council may be proposing to use the remaining funds to improve its financial sustainability.

Councils may add notes to the program table as necessary.

* Part B of the application provides councils with the opportunity to explain their program of expenditure and the associated impacts on their financial position in more detail.

Enquiries regarding the completion of this application or the application process should be directed to:

WORKSHEET 5

The aim of this sheet is to show the average rate increase in 2013/14 in each rating category and sub-category. It also compares average rates with and without the proposed special variation, and shows the impact of the proposed increases on different rate levels in the main ordinary rating categories. All ordinary rates and special rates must be included for the average rate calculations, even if the special variation percentage does not apply.

Note: All rate estimates should reflect expected rates (average or actual), inclusive of any expiring variations.

Impact on Average Ordinary Rates

Cobar Shire Council

WORKSHEET 6

PROPOSED PROGRAM OF EXPENDITURE

This sheet shows how the council proposes to spend the additional income that would be gained from the special variation. Inis sheet shows how the council proposes to spend the additional income that would be gained from the special variation. Input up to 10 years of expenditure projections which demonstrate the proposed allocation of the additional SRV income over this period. To do this, enter proposed spending allocations under each of the headings as relevant - maintenance of current services, enhanced services, new projects or borrowing costs. Add or delete rows if necessary. Some projects may cease before the tenth year, and these cells may be left blank. For additional SRV income in years beyond the period of the special variation, councils may input the same level of cumulative income as in the final year of the variation.

Note: the information presented here should be consistent with the Long Term Financial Plan (LTFP).
