Submission:

I believe in development to the infrastructure, yet I do not support the proposed increment to be effective from July 2014.

My reasons are that already citizens on low threshold are paying for annual rise in water, electricity, gas costs. In addition the six monthly increase in transportation costs is an extraneous to us.

Since I am a mortgagee and repaying my home loan as well, I do not support the bid.

Thanking you in advance.

Yours faithfully,
