

coffs harbour city council has applied to IPART for substantial increases to the general rate for 2015/2016/2017 in addition to the rate increase already approved for 2014/2015 disregarding the wishes of rate payers as expressed emphatically in the community survey funding our future. CHCC, has with individuals and commercial enterprises must live within financial limits by proper budgeting and management. CHCC seems to believe that budgeting and management control is synonymous with "make another application to IPART for a special variation" I believe that IPART should not allow SRVS to be an escape route from proper budgeting and management process. i make a submission to IPART requesting their rejection of council application for a special rate variation. Any rate increased to be not more than the rate pegging as aproved by the NSW GOV.
