Submission: I have lived in Mount Riverview for the past 42 Years over that time I have seen a steady increase in rates which I understand, but over that time I have not been aware of a lot of infrastructure being done we have had new foot paths to Mount Riverview school, but we still have many street that do not have curb & guttering which my street is one of them. I was told when I first moved into the area it would take 25 years it is now 42 years. I go to the Upper Mountains or even Glenbrook and see a lot of money spent in those areas, has council forgotten where MOUNT RIVERVIEW is?. I would like council to spend more time discussing the best way to save our hard heard money and less time discussing same sex marriage to my knowledge it is not a council concern. [REDACTED]
