Submission: I do not support the increase the rates for the Lithgow City Council Local Government Area. I believe through better management and budgeting Council will be better able to manage our assets and infrastructure. I cannot understand how they can justify spending so much money on the Halloween street party each year but fail to afford managing our assets and infrastructure. Don't get me wrong I think the Halloween street party is a good idea however Council should be focusing more on looking after its key responsibilities first.
