**Subject:** IPART Infrastructure Contributions Reform - submission

Chair

IPART

Submission on Draft Review

Where are ratepayers addressed and included as stakeholders amongst the groups on page 4 of your presentation?

Who and how were the 32518 stakeholders determined so that different communications could be sent to different stakeholders? Why was it necessary to tailor the communications to target different stakeholders?

This review did not appear to be amongst the business papers of Richmond Valley Council – so how are ratepayers supposed to be aware of this study/ review and to what extent if any are local councils involved?

Any conclusions would appear to be flawed as full and true cross sections of ALL stakeholders has not been undertaken.

Sincerely

Ian Drinkwater  
President
