Your submission for this review:

Hi, Both of you are government owned entities, IPART & Sydney water, you are both acting like a Mafia. To increase the very expensive price to 18% is pure extortion, especially in these times of hardship for Australians. I am shocked that our government is using you as the instrument to extract yet more money from Australians who are already suffocating from such bills. Australia is very rich, yet it punishes its people by such totally unacceptable heft charges. This should be halted completely. NSW government is famous for colluding against its people. Our democracy is turning into a dictatorship, utilising IPART & Sydney Water. They make the law, they fool people with these time wasting consultations, because prices will increase anyway. They are playing judge & jury. I am totally against it, it untimely and extremely unacceptable. Why are we punishing our people even more, as if the heavy bills they have been subjected to are not enough as it is. So many families are barely coping and yet you choose to hurt their lives even more. A government that expect its citizens to be very patriotic, yet it behaves in the most unpatriotic way by increasing services bills relentlessly in such a difficult time for NSW residents. Halt your immoral extractions. No no no to this proposal. Adam Farhan
