Your submission for this review:

Do you mean water rates only or is your increase 34 % on the total bill including the sewer service and stormwater service. I think it is totally out of the question to set any increase at 34 %. Do you think our pension or super has increased with 34 %? And this is on top of the high Council rates increase only because the Council was mismanaged for so long. Why should we have to pay for their mistakes? It is getting expensive to live on the Central Coast, it is no longer cheaper to live here than in many other places in Sydney. Regards, Anette Johnsson
