Submission: Raising rates would start to make our new home unaffordable, we need to renovate our current home to meet the needs of our family, which submitting plans to council was an expensive task in itself. We haven't even paid a builder yet. As well as I do not think council is doing it's best to look after our storm drains in east Lismore. We continually have a back up of flash flooding in our home. Yet the drain running in front of our neighbours home remains dry. Frustrating when you pay over \$2000 per year.
