Proposed BMS and Rate Variation – Lismore City Council

We are the property owners at [REDACTED] and two other properties within the Lismore City Council area (which are our Superannuation as we are retired).

We strongly object to any rate variation or increase for the Biodiversity Management Strategy proposed by Lismore City Council as we already manage and will continue to manage any pests and weeds and take care of the properties.

We also feel that Pensioners, Self Funded Retirees and low income earners already pay out enough in rates etc and cannot afford additional rates.

This is the third time we have sent in a submission and it appears Lismore City Council is determined to slug Rate Payers one way or another until they get their way. Our view on this hasn't changed and we feel this is a continuing waste of Rate Payers money.

Yours faithfully,
