Dear council,

Whist I agree that council rates need to be raised, to rise the current rates by 7.5% for 7 years is completely unrealistic. Who gets a pay rise of 7.5% every year?

We live in an area with a large population of Defence Families. How can you raise council Rates by 7.5% knowing that defence personnel hasn't had a pay rise in over 3 years? and then continue on year after year with Rates Increases?

I disagree with the greediness of this proposal.

When families have to tighten their budgets they look for areas of wastage and reduce unnecessary spending. Treat council money as your own.

Kind Regards,
