Submission: I am strongly against the proposed rate rise as Hawkesbury Council unjustly sets the rate off property value. Why should I be penalised because I bought when the market was down but now the price has gone up I am being fleeced. I doubt very much I will see any improvement to services by Hawkesbury Council why should I pay more for my bins to be collected than say a resident in the next street because my house is valued higher? The roads in my area on the west side of the river are a joke yet Council still finds money to spend resealing roads that dont require anywhere near as much attention which happen to be on the east side of the river in denser residential areas such as South Windsor.
