Submission: Why should Hawkesbury council raise my rates when 1: I supply my own tank water. No water supply in my area. 2: no Septic. I own and service my own septic system. I pay \$[REDACTED] a year for this service. 3: every time I turn a tap on or flush my toilet this is using electricity. If council supplied this service my electric bill would be lot less. 4: I don't have street lights. It's not safe for me to walk at night. 4: I don't have foot paths. 5: I don't have any local parks. 6: it takes me over 1 and 1/2 hours to get to and from work each day. Both Windsor and Richmond bridges are well over needing additional lanes. 7: if flood water rise I have no way of getting my children from school. The list goes on and on. I can understand if you where putting in infrastrucur in our local area but this is not happening. You need to give a service before trying to raise rates by 33%. I do not agree with this. Do something about it.
