Submission: Hawkesbury residents have endured countless rate rises over the years and have received a drop in council services and a town that is backwards. Council should be made to account for the use of taxpayer money and be seen to be using their current budget more sustainably and creatively. Reduction of wastage, investment in infrastructure, allowing positive development in the area and fixing the problems that have been plaguing the community for years. Residents are already experiencing increased costs of living with little or no rise in wages, it is unsustainable to expect people to pay more money for services they do not receive.
