Submission: There has been no active work on behalf of council to improve industry in the town. Managers are approving the purchase of council vehicles from out of town, not supporting local business. Small business is almost nonexistent and entertainment minimal. Lithgow council should have a forced merge with Bathurst Council or at the very least an investigation into why people within council are actively trying to stop anything positive for our town.

Industry have approached council looking for land, buildings etc and have not been supported in their endeavour to move their business to Lithgow and have instead gone to a council which is positive in promoting the town (Bathurst).

It is widely known within the community that there is [REDACTED] in Council. Enough is enough, without change our little town will die!

We are in prime location with direct train links to Sydney and we should be thriving, so sad that we are not!
