Submission: There is a clear case for amalgamation of Councils.

The existing councils are:

- . inefficient
- . run by a group of people with limited local interests and no the interests of Sydney as a whole
- . distracted from their main purposes by ancillary issues beyond their control e.g. nuclear disarmament, the cost of housing, unemployment, race issues etc.

I strongly support amalgamation of councils into about 7 for all of Sydney. 20 for the State. Next get rid of the state governments and move to a central country Government without the duplication and disputes between states.
