Submission: "Council's decision to apply for a rate increase has not been taken lightly and follows considerable community consultation"

This community consultation, which by the way, had a MAJORITY vote AGAINST Council's proposal

"In July/August 2018, Council undertook extensive community consultation about a proposed SRV, possible rate options and projects and services to be funded"

"Council considered the community feedback from this consultation at its meeting in October"

Council members then once again completely ignored community feedback, the MAJORITY of which was AGAINST Council's proposals

So much for Council members being voted in, to listen to and work for "THE PEOPLE"

I VOTE NO
