Submission: I object to this srv. I am a rate payer and a small business owner. My business also pays commercial rates. I started my business less than three years ago. I have invested many thousands of dollars into setting this business up. I estimate it will take approximately five years to make this business profitable, therefor a srv at this point in time would have an adverse affect on my situation.

I also objected to the council when they sought feedback from the community.

Council reported that the result of this survey was 72% no and 14% yes.

I was shocked that the mayor stated that there was overwhelming support for the srv.

He must be unable to speak to his council staff.

I have many customers who are retired, they also express their concern about a srv rate rise.

This region is currently investigating world heritage listing. We have a unique environment, over development would put at risk the life style we enjoy here.

I thank you my submission will be respected.
