Submission: To whom it may concern,

I live in Woodenbong on the Northern New South Wales/Queensland boarder.

Our town is Right on the boarder of Kyogle and Tenterfield shires to the point that Tenterfield shire is our boarder to the west and Tenterfield shire has to pass through the center of town to get to parts of their shire to the North. A large amount of our citizens that make up the community are already living in the Tenterfield shire. As a community when ever we are looking for funding, the first point is to work out whom to ask.

Most of our Infrastructure comes out of Tenterfield, Our water is sourced from Tenterfield shire, The power substation is in the Tenterfield shire.

The main road to our north which gets us to Warwick, a major point for shopping in our township. Is maintained and in the process of being upgraded by the Tenterfield shire. The southern access to our township is through Tenterfield. To this end most of our roads are in a hell of a mess as we are in no mans land as far as traffic is concerned with both shires.

We are by proxy the northern entry point to the Tenterfield shire from the southeast corner of Queensland. Having our southern boarder with Tenterfield some Eight klm to our south.

To this end, I believe that not only us but also towns to our south being Grevillia, Urbenville, Old Bonablo, Bonablo and Mallanganee, are also afflicted with the dual boarder problem. Everyone included would also be helped with a change to the shire boundaries moving to the Tenterfield shire.

Thank you
