Submission:

HI, I wish to strongly object to the 12.5% rates increase Liverpool City Council intends to impose if allowed to do so. They have had 5 years of a special 9% increase to get their finances in order after the administrator handed back control. they have done so admirably thank you. I find it therefore an affront for them to apply for the extra 9% to be a permanent increase. A CPI is sufficient and should be enough to balance their budget

I want to point out in this time of wage freezes, no pay increases and low interest rates on investments, many people just cannot afford on top of all other increases a money grab by LCC.
