Submission: I would like to know how a council who wastes so much money can apply for the highest rate increase when only as I believe 27% of those surveyed selected the improve component. They gave spent 100's of thousands of dollars on codes of conduct because we have a council of people who are only there for themselves and not the rate payers. Last year they tried to make the rate payers pay for kerb and guttering which is infrastructure and for which they also received a grant for the work done. This council should either be merged or have an administrator put in
