Submission: I am opposing the amalgamation of Randwick Council with Waverley Council. Randwick Council is big enough to be 'fit for the future' and has always been efficient and financially viable. The whole process of the amalgamation discussion was flawed, the residents have never properly been given a voice. The survey that was handed out to households only reflected the opinion of ONE household member, there was no option for all members of a household to respond, and the phone and internet surveys conducted did NOT allow for the option 'no amalgamation'. Residents could only choose between the different amalgamation options. This was a completely flawed process and I am therefore calling for a referendum to ask residents what they really think!
