Submission: As a long standing citizen of a range of sydney suburbs I must plead that this terrible plan not go through. The only thing standing in the way of due diligence is a streamlined council where only one head panel needs to be bowled over to allow disgraceful development by investors and developers here and abroad. We already have enough problems to fix within sydney currently and a splattering of cement monuments to terrible planning and architecture. Let's fix our existing city before talking about bringing in corrupt bankrupt neighbouring councils like botany or rockdale.

My worst time ever in Sydney was living in sans souci and now being a citizen of Darlinghurst is like living in another country.

Our transport, shops, cafes, parks, farmers markets, community gardens and walkability low rise developments are already under threat enough . My self and my fellow neighbours say a resounding NOOOOO WAYYYY!!!!!!! Keep Sydney as it is for the sake of us and our reputation as a world class city!
