Submission: I am a rate payer in Randwick City Council and I am against the proposed rate rise. I do not believe that the council have validly consulted with the rate payers using the small number of surveys. The impact is too great in all ratepayers for he council to push it through eight such little 'consultantion'. As it stands the council has been approving high rises at the rate of noughts across this area with no proper well thought out addition to infrastructure.
