Your submission for this review:

Dear Sir, Like all things I am sure the council is doing what they feel necessary to look after the community. It is quite possible the water and storm water needs regular maintenance and upgrades to provide safe drinking water to every one. However, not only has the rates recently been massively increased for the area I live, we have just been through a major pandemic which has affected most people financially, and as a nurse, we did not receive our pay rise to keep up with inflation this year as the government could not afford it (although we were still expected to put our own health and lives on the line and those of our family and loved ones to look after everyone else!) Insurance for everything also went up this year (although I am not sure why when less people were having car accidents, less primary health reviews and surgery were done, and most people were home, so there were less break ins!) To add yet another increase to routine expenses, is really a bit much to ask of people on the coast this year. I would therefore request you delay this price rise of water and storm water for another year, till we can recover somewhat from this year. Surely the upgrades and maintenance can wait another year? thank you for considering my submission.
kind regards [REDACTED]
