If the propose increase goes through it will cause many residents into financial distress. My rates have already gone up by close to \$97 per quarter and my understanding is council now want what will equate to another \$300+ a year for water. Perhaps for them money grows on trees but thats not the case for many on the coast who will have to once again go without just to fix councils mismanagement. Please put yourself in the shoes of those who will struggle with this to essentially find more money after already struggling to find the addition \$\$ to pay the higher rates to fix the councils mismanagement
