Your submission for this review:

The justification of the council request is not sufficient enough for a rise in water rates. They have just had an approved rise in rates which has cost the residents of the central coast up to 34% more in their rate costs. This should be sufficient to include costs to maintain water costs across the coast. The council is spending our money on unnecessary investments such as spray painting words on boardwalks around the coast. Can they not use funds allocated to that garbage on maintenance that is necessary
