Please dont, our community has just had covid, 3 floods, bushfires and a 45% increase in rates now water rates ? We dont understand at all most of central coast do not even have drainage, stormwater, gutters or clean water, All we see is ccc with their hand out while we wait for years (still waiting) for drainage that doesnt run directly into our lake, its the council structure and top management that is the problem. This community is mostly middle class with high unemployment and pensioners we cannot afford as a community any more rate hikes. Get the council to fix their issues, stop spending money on the infrastructure in the only Elite area Terrigal Maybe we would get a drain or stormwater rubbish catchment before they spend money on a pathway for the 3 million Terrigal houses.
