Submission: To whom it should concern. I am deeply disturbed that a newly amalgamated council that the community has not even had the chance to vote on, feels they should target already struggling rural communities with an outrageously high rate rise. I feel that the council has attempted to get this passed in a sneaky and underhanded manner. This is not the sort of council antics anyone should support. I hope you also feel that council should be held by people of integrity. Please do not allow/encourage this terrible abuse of power by passing the rate rise and causing whole community's that are supposed to be looked after by council to be oppressed by them. Regards, Mid Coast Resident
