Submission: Whilst I understand the view and need of the shire council to improve water quality in our waterways, I feel that it is unreasonable to continually increase the rates over and above the rate of inflation when house hold income in the area is lower the the rate of inflation, people simply can not afford to keep paying these increased prices. Come on council we cant afford these prices, find your money some other way, cutting cost for instance, that is how most house hold are going to have to do it.
