

26/2/20

TO WHOM IT MAY CONCERN,

Just a few lines to protest against this rate increase that the Lismore City council has applied for. The main gripe I have they are trying to do a lot of work in house and it is costing them a lot a real lot more than if they got contractors to do it + the outlay for new machinery, utes etc and the roads they do leave a lot for the imagination and there is always a lot of people standing around,

How would I know I have spent 40 years in constructing roads and subdivisions and laying storm water, sewer and water pipes from the old earth and ware up to the PVC pipes and hand building manholes up to the ready made ones also I think the council is top heavy to many layers of people driving around in utes and also they seem to be against growth they want on top of the fee for new buildings a cash donation of anything up to nearly \$100,000 on big industrial sheds?

That is part of the reason I think that they would just waist this money if they got it and for my money I do not think they should get it.

Yours Sincerely
