I think Randwick Council should not increase the rates. I am shocked at the level of change taking place on the roads, and the increase in development. I have no doubt that the increase in development increases the Council rates. I am opposed to the overdevelopment, which brings extra people and traffic into the area, and changes to our public transport system that is decreasing access to hospital and taking away our natural environment and buses. I would be appalled if I was asked to increase my rates after all these costly changes. Underground electricity should only be done in new suburbs where the electricity has not been laid yet. Council should not plant trees which grow very tall under electricity wires and then have to be hacked when they grow too tall.
