Submission: I cannot believe anyone of sound mind could suggest that Randwick Rate payers want and would agree to a 20% increase in Rates! I strongly object to this Proposal and would like this matter to be reviewed in a democratic honest and open way - How dare the RCC try to trick people in this dishonest way! You should be ashamed of yourselves! By asking for such a rise in Rates proves to me that the current regime is incapable of utilizing the resources they have to maintain/improve our respective areas - they all should resign immediately! A very successful man once said "if I want a job done quickly I'll give it to the laziest Employee because they will always find an easy way" - the easiest not the least expensive - I believe the RCC are showing their laziest.
