Submission: Dear Sir/Madam,

It is with great concern that North Sydney Council is pushing ahead with a two times plus the rate of CPI rate increase per year over the coming years disregarding the wishes of the community as per the results of the consultation phase. Money spent on consultation with little regard for adopting the majority of rate payers wishes. Increases over double the rate of inflation puts increased pressures on local families, residence and business driving up inflation with businesses and property investors increasing rents. I suggest this submission by North Sydney Council is re reviewed revisited and the wishes of local residents, families and businesses carried out.
