Your submission for this review:

Thank you for the opportunity to make a submission, however I regret that the vast majority of Central Coast Residents will be unaware of this new money grab from a council most of us never asked for. I agree with your published range of issues, but would like to see an investigation into how council has used its current water, sewerage and stormwater income. I like many other residents have been hit with massive rate increases due to the miss-management of council and dont want this compounded with further increases which I dont believe are justified. Whilst elected councilors and the CEO were dismissed and replaced by an administrator, no proper investigation into the culpability of senior management in council has been conducted. So I would like to see the results and recommendations of the independent public inquiry into the council and its financial management before any further increases in costs to the residents are even considered. Continuing without some drastic changes to the way council is managed will only insure that any increases will continue to be mismanaged.
