Submission: This rise each year is ludicrous and very demoralising to anyone on a pension that is struggling with high rates and bank loans

I myself being on disability pension will be struggling with this rise every year my rates were cheaper when I was living in Penrith

There is no explanation as to where this money is going

If council can not allocate money now how will they be able to do it in the future

I vote NO to the variation and hope that you listen to the people not council's pocket
