Submission: We need this rate rise. We have been impacted by circumstances over the past view years such as Tillegra Dam and amalgamation. This has seen previous councils being less than proactive in looking ahead. Our road system is fully under Dungog Shire responsibility and we have an extensive bridge system. The srv application is on a sliding scale that over time lessens the impact for the rate payers and many rate payers need to realise it is only on the general rates. This is a lifeline that Dungog Shire needs. Our roads and bridge system need the srv.
