Submission: I disagree with the rate rise. We already pay quite a large amount for rates-almost \$ [REDACTED] per year. Plus water rates have gone up in price three fold. As a family of five it is becoming hard to own a home and live while prices continue to hike - as a community we also are seeing ridiculous decisions being made with our rates money, buying straw horse statues for instance when our pathways aren't stable and our amenities aren't up to scratch.
