Submission: The rates we already pay are a struggle and in return we recieve a main road that is very rarely maintained (if lucky it is once a year) to which we are further forced to buy 4wd as the road is not suitable for a smaller car taking further money from us when the council recently spent all that money on purchasing the blue horse? Put your people first and the basic needs of keeping a road maintained, after all we pay rates for those basic necessities yet we do not recieve them.
