Submission: Everything around us is going up in price. More and more families are struggling to survive now as it is without any rate rises. Once they have a rate rise they can't decrease them. A rate rise will have a massive impact on the costs of living. Families should not have to fork out extra money when the State Government can provide money to our Council to help it out. So please don't agree to a rate rise for our council. We(rate payers) can't keep paying more money for rates. It is going to break a lot of families. A rate rise might not sound like much to some people but to others it means more than most will ever know. So please NO rate rise. Thankyou
