

## **We are opposed to the SRV**

### **Affordability**

We cannot afford the current increases in the rates we pay now; further increases will cause our family financial strife.

### **Efficiency of council**

Council salaries take too much of our rates. The money should be spent on the basic physical and organizational structures and facilities needed in our community

### **Information sharing/communication**

Council schedules important meetings for on local issues at times where most rate payers cannot attend. They also do not give sufficient notice of these meetings so that rate payers who work may be able to take time off to attend. If those rate payers do not attend, their vote is deemed a "yes" vote on the issues. This skews the vote and is not a democratic system.

This council should be subjected to an independent administrator's review as we can no longer have faith in them.
