Your submission for this review:

The central coast residents have just had a rate rise, we have a rising cost of living, rising inflation the cost of everything has gone up. Besides the infrastructure that is already in place the product we are paying for the water is free. Its not like it has cost more to get free rain? Water is a basic human right. Not a commodity for council to make money off. I pay for what I use how it should be. [REDACTED] to charge rate payers more. We already pay enough in tough times.
