Subject: re shoalhaven rate rise

This is a terrible burden on the already burdened community.

We have a GREENS Mayor, [REDACTED] Her answer to a ratepayer about rents becoming unaffordable , was that the owners of properties would not put the rents up since they can claim it on their tax.

This rate rise is causing terrific stress in our community for people who are on fixed income and and that is a large percentage of our population. Greens always want to appear that they have a heart, but they are heartless in getting through their agenda.

Please, listen to the voice of reason. [REDACTED]. They love spending other peoples money.. Several Council meetings ago they wanted to enact veery expensive Ocean levels rise... Don't we have the Federal and State Governments to do that. They hate to think that Roads Rates and Rubbish are their main tasks... They can't even do that right.

Please for the sake of already stressed ratepayers. Say No to this preposterous resolution.
