Your submission for this review:

Hi, it is imperative, for the health of the children and pets of Broken Hill that water remain at the same pricing method before the Murray River pipe was introduced. Broken Hill has both a mining and environmental source of lead in town and people need to be able to afford to maintain lawns and keep pathways clean of dusty for the safety of their children and pets. It is bad enough to have a child with high lead levels, they can be treated, it is truly horrible to see your pets die of lead poisoning. Broken Hill people were also not in favor of the pipeline from the Murray River and have been forced to have it and therefore should not be responsible for paying for it. The push for the pipeline came from the national party and agri business on the Barwon River. These are the people that should be paying for the pipeline. thank you, Eve-lyn Kennedy Broken Hill
