Submission: This proposed increase will have a dire affect on my families finances. 33% over 3 years, I understand it probably won't get up, but for the council to even apply for this extraordinarily massive increase beggars believe. I live on a rural 10 acre property and council only provide my family with a garbage collection. We collect our own water and have an enviro-cycle for our waste. We have no street lights, footpaths, water or sewage provided by council. We cannot sub-divide our land, the prices for homes in Kurrajong has barely increased at all over the 20 years we have lived here and now this. This council should be sacked. They also have the \$22 million for our new river crossing and have now decided they don't like the proposed site the Liberals agreed on. So every, day hundreds of us sit in appalling traffic conditions crossing the river at North Richmond. Not for the residence of Hawkesbury this council but for themselves.
