Your submission for this review:

Central coast council administration and the amalgamation have created this mess and we are expected to fix it! My council rates have increased by 45% this year, and this is before next years new land valuation, if these water rates are approved, what then? Am I expected to pay these extreme charges for my modest home due to no fault of my own? This is beyond comprehension, as I budget very carefully this is going to be a big hit to my cost of living. They are rating us right out of this area, I have lived here for 33years, and we built this forever home, I believe no further costs should be our burden, this situation has been created by 2 levels of government, and they should be responsible for any necessary grants and financial assistance, NOT the ratepayers.
