Your submission for this review:

Hi, I live in Mardi, so I have no issues with water, waste water. Services are absolutely fine (I live in the new estate). Price increase, if any, should be gradual. Capex will not be all spend in year 1. Not right to compare what other water services provide, CCC charges less so we should be allowed to get an increase. Hold them accountable? They were able to Rort the system for years on end without repercussions. Even now, the union excesses in operational costs and costly red tape have not been addressed. So why would they do better. Tax payer is paying anyway, as seen in their proposal. General rates are going up as well to cover their excesses. We cant hold them responsible, we can only hope ou do. Good luck
