Subject: Coffs Harbour's lack of concern to ratepayers discuss with rate hike

Coffs Harbour Council and staff sent out a survey about what the ratepayers wished about a rate hike. Three surveys came back with a 78% and higher rejection. Coffs Harbour staff's comments were that the survey was unreliable. I bet if the vote went the other way they would have said the ratepayers set them a mandate.

They also gave the GM a 20,000 dollar raise, [REDACTED]

We also believe that the 6 councillors who voted to go forward with the GM's raise and the rate hike are trying to ultimately use that money to build an unwanted Entertainment Centre which we don't want.

We need to remember this at the next election and eliminate those 6 councillors.

Rate payers please pass this along to other friends in the area
