Submission: People moved to Port Stephens as they did not want to live in a high density area with unnecessary infrastructure, we moved here as this is how we want to live.

The [REDACTED] driven council think we all want to live in a bangladesh type environment with high density high infrastructure
WE DONT want infrastructure we dont need infrastructure
those that do want it should move to a city area
this area is already overcharged for rates and we will not be paying one red cent extra and We will welcome a high court class
action should we need to.
this area is not a city area, we do not need and did not ask for future development as in clubs, schools, hospitals, librarys etc.
we can all travel a short distance to that.
this council greed must stop and I urge you to consider the lifestyle of those that live here and the future of the area. A city type
environment is NOT the future of Port Stephens although this greedy no clue council will try its best to destroy it.
Those that want all that city life crap can pay extra rates, those that dont want it should not be forced to, and in turn be forced to
move out of the area due to greed.
please consider this rates rise as a [REDACTED] cash grab by an already [REDACTED] council that cant manage its money and has too many
overpaid under achieving staff. this will be the first attempt at a slippery slope of [REDACTED].
VOTE NO
Thank you
Gary Keevill
