I object to this proposed rate increase .

As a rate payer who has relocated my business to the area this is a big blow. Firstly as a rate payer this is an offensive rate of increase. With two kids this is a massive financial stress to absorb.

As a business owner taking this money out of circulation can only drive down demand and add further financial stress. Furthermore with increased development increasing the amount of rate payers the council should b discounting rates as economies of scale come into effect for such a large council and area.

Is the problem mismanagement in council that creates a need for a money grab??

Last year was an election for local council , this issue should have been discussed?

Again this rate of increase in obscene and council should be ashamed of itself for such a proposal

Questioning
